

METICULOUSLY SELECTED AUSTRALIAN HARDWOOD FLOORING BOASTING A UNIQUE DESIGN WHICH ACHIEVES A THINNER BOARD WHILE MAINTAINING THE ELEGANCE OF SOLID TIMBER

AN ATTRACTIVE, YET THINNER SOLID TIMBER FLOORBOARD THAT IS SUITED TO ALL RESIDENTIAL AND COMMERCIAL APPLICATIONS WHERE TRADITIONAL SOLID TIMBER FLOORING CANNOT BE INSTALLED

83mm QLD Spotted Gum

Timber Species

Solid Overlay and Wideboard Solid Overlay timber flooring is available in a large range of Australian hardwood timbers. Selecting your timber species for your new timber comes down mostly to an aesthetic choice. The timber species will determine the general look, such as colour and grain patterns, however with timber being a natural product even within one species there will be variations. Some species exhibit only small variations while others vary greatly in colour and features.

Popular Australian Species

Blackbutt	QLD Spotted Gum
Blue Gum	Roasted Cayenne
Brushbox	Roasted Peat
Golden Oak	Stringybark
Ironbark Red / Grey	Tallowood
Mixed Hardwood	Tasmanian Oak
New England Blackbutt	Turpentine
NSW Spotted Gum	White Mahogany

Can't see the species you are looking for? At NS Timber Flooring we supply so many species it is hard to list them all, so if there is another species you're after please contact our team and we will advise on it's availability.

180mm Brushbox

130mm American Oak

SOLID OVERLAY by NS Timber Flooring

Solid Overlay and Wideboard Solid Overlay Timber Flooring

Solid Overlay timber flooring is a product designed for applications where the beauty, style and warmth of a solid timber floor is important, but there are limitations on the area's sub-floor or the application requires a floor thinner than traditional solid timber flooring. The reason solid overlay timber flooring can achieve a thinner board thickness is because it is only designed to be installed directly over a flat, structural and well-supported surface such as existing timber floors, concrete or plywood.

Thanks to the unique design the wear thickness of an overlay timber floor is not compromised by the thinner board thickness, retaining the same wear thickness as traditional solid timber floors.

Solid Overlay timber flooring can be installed in most situations; however there are specific installation and fixing procedures that must be followed to ensure the long term performance of the timber floor.

Features and Benefits

Solid Overlay timber flooring and Wideboard Solid Overlay timber flooring are essentially the same in design, with the difference being the individual 'Wideboard' floorboards are much wider giving a bolder appearance. Some of the key features and benefits of overlay solid hardwood timber floors are:

- Thinner boards (14mm), perfect for renovations or refurbishments where existing floors are in place
- Long lasting and hard wearing
- Easy to maintain
- Installation over existing timber, sheet floor and concrete
- Can be re-stained to change the floor colour
- A renewable resource with a low manufacturing environment impact
