

TRADITIONAL AUSTRALIAN SOLID TIMBER FLOORING OFFERING TIMELESS BEAUTY AND AN UNRIVALLED LEVEL OF STYLE, PERFORMANCE AND DESIGN FLEXIBILITY

THE KING OF TIMBER FLOORING, PERFECT FOR RESIDENTIAL AND COMMERCIAL FLOOR INSTALLATIONS WHERE QUALITY, LONG-TERM PERFORMANCE AND AN ALL ROUND REMARKABLE APPEARANCE IS A MUST

Timber Species

Solid Timber Flooring is available in a huge range of performance tested Australian hardwood timbers. Selecting your timber species for your new timber comes down mostly to an aesthetic choice. The timber species will determine the general look, such as colour and grain patterns, however with timber being a natural product even within one species there will be variations. Some species exhibit only small variations while others vary greatly in colour and features.

Popular Australian Species

Blackbutt	New England Blackbutt
Blue Gum	NSW Spotted Gum
Brushbox	QLD Spotted Gum
Golden Oak	Stringybark
Grey Gum	Tasmanian Oak
Ironbark Red / Grey	Tallowood
Mixed Hardwood	White Mahogany

Can't see the species you are looking for? At NS Timber Flooring we supply so many species it is hard to list them all, so if there is another species you're after please contact our team and we will advise on it's availability.

SOLID TIMBER by NS Timber Flooring

Traditional Australian Hardwood Flooring

Solid Timber Floors, or traditional wood flooring, offer an unrivalled level of beauty, warmth and durability. Solid timber is the perfect flooring choice for high-traffic homes and business, featuring low level maintenance and damage resistance. Solid timber floors can be re-sanded and stained allowing owners to easily change the colour and appearance of their floor.

When compared to new engineered timber flooring, solid timber is still king and generally more durable and is able to be sanded and finished over time. Solid timber flooring is hypo-allergenic as it does not have fibres to trap in these things that can be harmful to our children, elderly, or those with existing health conditions such as asthma.

Solid timber flooring can be installed in most situations; however there are specific installation and fixing procedures that must be followed to ensure the long term performance of the timber floor.

Features and Benefits

Solid timber flooring provides a long lasting and beautiful appearance. It can be sanded and finished as the years go by, so longevity is built into the product. Below are just some of the key features and benefits of a solid timber floor.

- Largest range of species, colours and grain patterns
- Long lasting and hard wearing
- Easy to maintain
- Installation over existing timber, sheet floor, battens and concrete
- Can be re-stained to change the colour and appearance of the floor
- A renewable resource with a low manufacturing environmental impact

Specifications
